<p>FLOOD INSURANCE COVERAGE</p>	<p>1. Standard Flood Hazard Determination (SFHD)</p> <p>Each loan delivered for purchase must include the Federal Emergency Management Agency (FEMA) Standard Flood Hazard Determination (FEMA Form 81-93) used in determining whether any of the improvements for a subject property are located within an identified “Special Flood hazard Area” (SFHA). SFHAs are shaded on a Flood Hazard Boundary Map and designated on a Flood Insurance Rate Map. These areas are designated by the following symbols: A, AE, AH, AO, AR, A1-30, A-99, V, VE, VO, and V1-30.</p> <p>Underwriter must ensure that there is no discrepancy between the flood hazard designation on the SFHD and the flood insurance policy if the flood insurance policy shows a lower risk zone than the SFHD unless the discrepancy results from the application of the NFIP’s “Grandfather Rule”. For information on the “Grandfather Rule” see Question #71 in the Q&A’s issued by the federal banking regulators available at http://www.federalreserve.gov/newsevents/press/bcreg/bcreg20090721a1.pdf</p> <p>2. Federally Available Flood Insurance</p> <p>Flood insurance is generally required if any building, dwelling, structure, or improvement is located within a SFHA that has mandated flood insurance purchase requirements under the National Flood Insurance (NFIP) (unless the mortgage is an FAH Section 240 mortgage). Except as provided in Section 12, if flood insurance is not available because a community does not participate in the National Flood Insurance Program (NFIP), Provident Bank Mortgage will not purchase loans secured in those areas.</p> <p>3. Location of Property Within the SFHA</p> <p>a. Principal Structure Located Within an SFHA Flood insurance is required if any part of the principal structure is located within an SFHFA. Flood insurance on detached buildings, such as stand-alone garages, sheds, or greenhouses, located within an SFHA is required if they serve as part of the security for the loan.</p> <p>b. Principal Structure Not Located Within an SFHA If the principal structure on a property is not located within a SFHA, flood insurance generally is not required even if another detached structure on the property is located within the SFHA.</p>

**FLOOD INSURANCE
COVERAGE
CONTINUED**

However, if the detached structure is attached to the land and serves as part of the security for the Loan, flood insurance is required for the detached structure (and may be purchased through a separate policy on a general property insurance form), unless Underwriter determines that the principal structure represents sufficient security for the Loan and releases the detached structure from the security. If buildings are “carved out” from the security, the property must be marketable in the event of foreclosure and the “carve out” must be permissible under the local zoning rules.

c. Waivers

Provident will waive flood insurance requirements if the borrower obtains a letter from FEMA stating that it maps have been amended so that the buildings securing the Loan are no longer in an SFHA.

4. Notice of Special Flood Hazards and Availability of Federal Disaster Relief Assistance.

If any part of the principal structure is located within an SFHA, the Loan file must include the Notice of Special Flood Hazards and Availability of Federal Disaster Relief Assistance that was provided to a borrower in accordance with the Flood Disaster Protection Act. The Loan file must contain evidence that the borrower received the Notice of Special Flood Hazards no later than 10 days prior to the closing unless the Loan file documents why it was not feasible to meet the time frame. The Notice of Special Flood Hazards may not be provided the same day as closing.

We recommend that the borrower receive the following additional information, or substantially similar information, either on the Notice of Special Flood Hazards or on a separate notice acknowledged by the borrower.

“If you obtain the minimum amount of flood insurance coverage identified in your Notice of Special Flood Hazards, you may not have sufficient coverage to rebuild or restore your home in the event of a catastrophic flood. You may be required to use your own cash reserves to make necessary repairs if the insurance is insufficient to fully repair your home. Servicers also have the right to require flood insurance coverage equal to the maximum amount available under the NFIP, which is more than you are required to obtain at the closing of your loan.

The borrower should carefully review their potential exposure to flood damage with their insurance provider and consider purchasing coverage equal to the maximum amount available under the National Flood Insurance Program (NFIP), which is the lesser of

- a) The maximum limit available for the type of structure; or
- b) The “insurable value” of the structure (the replacement cost value)”

**FLOOD INSURANCE

5. Acceptable Policies

The flood insurance policy must be in the form of the standard policy issued under the NFIP. Policies that meet the NFIP requirements, such as those issued by licensed property and casualty insurance companies that are authorized to participate in the NFIP's "Write Your Own" program are acceptable.

6. Multiple Structures

If multiple buildings securing the loan are located in an SFHA in a participating communication, the Underwriter must determine the amount of insurance required on each building and add these amounts together to determine the minimum amount of flood coverage. Each building securing a loan must be covered by separate policy. The amount of total required flood insurance can be allocated among the secured buildings in varying amounts, but all buildings in an SFHA must have some coverage.

7. Mortgagee Clause

The mortgagee clause on all mortgage policies, binders, and certificates of insurance must show the mortgagee using the following language.

LoanCare, LLC
ISAOA/ATIMA
