**APPRAISAL
REQUIREMENTS
CONTINUED**

- Items that are excluded from the Lead Paint Abatement certification are as follows:
 - Minor repair or maintenance activities that disturb six (6) square feet (2' x 3' space only) or less of paint repair per room inside the house. Square footage must be stated by the appraiser or abatement contractor
 - Minor repair or maintenance activities that disturb twenty (20) square feet (4' x 5' space only) or less on the exterior of the home or building. Square footage must be stated by appraiser or abatement contractor.
- If the home was built after 1978, work can be completed by the seller or a licensed painting contractor. All bare wood must be primed or painted and the work verified by the appraiser, a licensed painting contractor, termite company or PBM.

Unpermitted Property Additions:

Properties with "unpermitted" structural additions are allowed under the following conditions:

- The quality of the work is described in the appraisal and deemed acceptable (workmanlike quality) by the appraiser;
- The addition does not result in a change in the number of units comprising the subject property (e.g. a 1 unit converted into a 2 unit)
- If the appraiser gives the unpermitted addition value, the appraiser must be able to demonstrate market acceptance by the use of comparable sales with similar additions and state the following in the appraisal:
 - Non-Permitted additions are typical for the market area and a typical buyer would consider the "unpermitted" additional square footage to be part of the overall square footage of the property.
 - The appraiser has no reason to believe the addition would not pass inspection for a permit.

Termite Report/Repairs

- All loans require a termite report (and clearance, if applicable)
- Final termite reports (if clearance is issued that would be considered the final report) must be signed (not initialed) and dated as Read and Approved by veteran before funding.
- Termite reports require **ALL Section 1 items** to be cleared by the termite company or licensed contractor and referenced on the termite clearance prior to funding. If the clearance states items were completed by others and appear to be completed in a workman like manner, it must note the party that performed the work.
 - Section 2 items that are required to be repaired are listed in the table below. The items listed below are the most critical items, but there are other items that may require repair (i.e. health & safety, structural, misc. repairs) Section 2 items that are not listed below should be review with Corporate Underwriting for determination of repair requirements.
